

PRESS RELEASE

Boxcryptor is now available for Windows Phone, Windows RT, and BlackBerry 10

Today Boxcryptor, the German encryption solution for OneDrive, Dropbox & Co, was released on three new platforms – Windows Phone, Windows RT and Blackberry 10 and is now available on eight platforms in total. Moreover, Boxcryptor now also supports OneDrive for Business, Microsoft's new storage solution for companies, on all existing and new platforms.

Augsburg, 04/10/2014: The encryption solution Boxcryptor is already available on a wide range of platforms. By now, Windows, Mac OS X, Android, iOS and Google Chrome users could store their data securely in the cloud. Today the German security expert released its awarded solution Boxcryptor for Windows Phone, Windows RT and BlackBerry 10. Now all major platforms are supported and users can enjoy highest flexibility when securing their files with Boxcryptor.

On the three new platforms, users can also use the largest cloud storage providers like Box, Dropbox, Google Drive, Microsoft OneDrive and 18 other smaller providers like SugarSync or Egnyte. Robert Freudenreich, founder and CTO of Secomba explains: "We worked hard on the new versions in the last few months and are very excited about today's releases. A lot of users have been desperately waiting for the support of these platforms and we are pleased that they can now benefit from the security of our solution on even more devices".

Additionally, the team also integrated OneDrive for Business on all new and existing platforms. Business users who want to store their files in the Microsoft Cloud using Office 365 can now encrypt their files with Boxcryptor and make sure that their sensitive business information is protected. Boxcryptor allows them to benefit from all business features and to work and collaborate in the usual way, while keeping their files protected.

Boxcryptor is available in a free basic version for private users. Those who want to take advantage of all functions (e.g. file name encryption), have the option to upgrade to the Unlimited Personal license (€36 / year) or the Unlimited Business license (€72 / year). For companies and teams starting from 5 users there are also special company packages available (from €6,40 / user / month).
