

PRESS RELEASE

Cooperation With the German Telekom - Boxcryptor is Part of the Free Protection Package for PC and Smartphone

Boxcryptor, the encryption solution for Dropbox, Google Drive & Co is part of the Telekom protection package "Made in Germany". The bundle combines four German IT security solutions and is targeted at private and SME users.

Augsburg, 03/18/2015: As one of four partners, Secomba GmbH - developer of Boxcryptor - participates in the Telecom package for the protection of PC, smartphone and tablet, which was presented in the context of CeBIT 2015. The free protection package includes the cloud-optimized encryption solution Boxcryptor, as well as the solutions of three other German IT security providers.

In the protection package, Boxcryptor provides security and privacy of the data stored in the cloud. The data is encrypted locally on the user's device and then stored in the cloud. Boxcryptor supports more than 20 providers, such as Dropbox, Google Drive, Microsoft OneDrive, but also regional providers such as the Telekom Cloud or Strato HiDrive. Users can access their data safely on all devices, as the Boxcryptor software is available for Windows, Mac OS X, Android, iOS and other platforms.

"We are very pleased to partner with the Telekom and to provide Boxcryptor as part of the protection package. This combination of four German products is a great competitive advantage, as many customers prefer security products from Germany. Boxcryptor makes it possible for users to work with various cloud storage providers, without sacrificing security and comfort. "Moreover, the partnership with a large player like the Telekom is an award for us, which also increases the confidence in our product in the German market" says Andrea Pfundmeier, founder and CEO of Secomba.

The Telekom's protection package addresses small and medium-sized businesses looking for a simple and quickly installed package of security solutions. From the second quarter of this year, the free version will be available at www.telekom.de/schutzpaket. The paid version - with more features - will be released later this year.
