Boxcryptor Gets a New Sales Partner: Value Added Distributor Jakobsoftware Includes the Cloud Encryption Solution in Its Portfolio

Value Added Distributor Jakobsoftware is a new sales partner of Boxcryptor in the DACH region. As of now, the Boxcryptor Company Package, the Unlimited Business license, as well as the Unlimited Personal license will be available at Jakobsoftware.

Augsburg, 01/30/2017: As of now, Boxcryptor will be part of the Jakobsoftware portfolio. The user-friendly cloud encryption solution "made in Germany" has already satisfied many private and business users worldwide.

Boxcryptor co-founder Robert Freudenreich on the decision to enter into a partnership with Jakobsoftware:

"Jakobsoftware has been a loyal partner for many software solutions in Germany, Austria and Switzerland for 20 years. By now, Jakobsoftware has established itself as one of the leading distributors for data protection and IT security solutions. We are pleased that Boxcryptor has found Jakobsoftware as a partner which helps to provide companies in the DACH region with data security. "

Jakobsoftware was founded by Jürgen Jakob in Göttingen in 1996. The Value Added Distributor (VAD) specializes in the distribution of high-quality IT security solutions for small and medium-sized enterprises. In addition to sustainable, sales-related support, Jakobsoftware offers German-speaking technical support by phone and e-mail for the products in its range. Boxcryptor will be in good company with IT security solutions by AVG, Hornetsecurity, Langmeier software and eScan, which are distributed by Jakobsoftware as well.

Boxcryptor provides end-to-end encryption for all major cloud storage providers, such as Dropbox, Google Drive, OneDrive, Box and iCloud Drive. The security software seamlessly integrates into the system by creating a virtual drive. Boxcryptor automatically detects the clouds used and adds them to the drive. All folders and files uploaded via Boxcryptor can be automatically encrypted on the device, which ensures maximum security. For business users there are additional features in an administration panel, such as user management with Active Directory support, individual policies, two-factor authentication and a company key.

Boxcryptor is among the products by 15 manufacturers which are listed at Jakobsoftware. The extensive retail network of the distributor consists of more than 3000 registered retailers.
